Table Instructions:

- 1) Place the appropriate DATE under each DAY of the week (in the heading)
- 2) On each day for the week indicated, mark the number of hours you spent studying in each of the listed environments. In the appropriate box, place the total daily time spent (accurate to nearest 15 minutes) and a number indicating the type of activity you engaged in (1 = working on assigned homework, 2 = working on assigned test review, 3 = attending class (108 class or math class), 4 = additional review or class preparation outside of class and outside of assigned work)
- 3) In the TOTAL TIME row under each day, list the accumulated time for that day.
- 4) Add up your Total Time spent on math and place in the space below.
