CNN | ORC
POLL

Interviews with 1,010 adult Americans conducted by telephone by ORC International on January 3-5, 2014. The margin of sampling error for results based on the total sample is plus or minus 3 percentage points.

The sample includes 707 interviews among landline respondents and 303 interviews among cell phone respondents.

FOR RELEASE: MONDAY, JANUARY 6 AT 8 PM

1985 May 17-20	11	8	13	67	2
1977 Apr 1-4	23	7	19	48	4

Question Wording for 1985: About how long ago did you last try marijuana -- within the week, over 1 week to within the last month, over 1 moth to within the last year, or over 1 year ago?

METHODOLOGY

A total of 1,010 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage. Among the entire sample, 30% described themselves as Democrats, 21% described themselves as Republicans, and 49% described themselves as Independents or members of another party.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".
