

**HOW LONG WILL THE
WAR BETWEEN ISRAEL
AND HAMAS LAST?**

The truth is that no astrologer really knows how long this war will last. Many non-astrologers and even some astrologers tend to think of astrology as a tool for predicting the future, but that is not quite right. Instead, astrology is more like a weather report. It can show when stormy conditions exist and when skies will be clear, and this allows us to subjectively determine that some events will be more likely than others. However, just as when a hurricane hits a region, people have free will and the way in which an individual exercises their free will has a big impact on how any astrological weather event will affect them. If they take precautions, then they can safely ride out any storm, but if they don't, then the outcome is indeed more predictable. Thus, in this presentation I'll describe some of the astrological weather for both Israel and Iran for the rest of this fall and during the next round of eclipses in March and April of 2024.

The planetoid Chiron is playing a major role in the events that are unfolding, so let me briefly describe its significance in astrology. Chiron resides between Saturn and Uranus, and its eccentric orbit takes it sometimes within the orbit of Saturn and at other times outside the orbit of Uranus. It is a bridge between what can be seen (Sun through Saturn) and what can't be seen (Uranus through Pluto). Thus, it is a drive to transcend and go beyond the visible world, but in the process it often has to first crack that hard shell that our Saturn drive has erected around us. When aspects involving Chiron are tense, then wounding is more likely, but when the aspects are good, then healing and the sweeter transcendent side of Chiron are more likely to manifest. Keep this in mind as we go through this presentation.

Israel has been blamed for the October 17 bombing of a hospital in northern Gaza, and the November 5 opposition of t. Uranus to n. Chiron will be intensified since this is the day of the 3rd quarter Moon. Also, evidence now suggests that the October 17 bombing was caused by a failed rocket that was launched at Israel.

THE BOTTOM LINE

The current conflict between Israel and Hamas could subside after November 2023, but tensions and existential threats could escalate again for Israel from March through May of 2024.

For Iran, tensions and threats may be at their greatest from March through June of 2024.
