Summary:

World

- This Lunar Month will be more intense than most due to two eclipses and the Saturn/Neptune conjunction that will continue to change the world order.
- The first half of the lunar month will see a lot of disruption due to hard aspects involving Uranus. However, the second half of the lunar month will see Uranus forming more positive aspects that favor constructive creativity over breaking.
- With Chiron making a semisquare/sesquiquadrate to the Lunar Nodal Axis throughout the lunar month, I expect a moderate amount of wounding to persist.
- Hard aspects involving Mars from the 1st Quarter Moon to the 3rd Quarter Moon could result in more aggressive actions around the world. However, with Mars in Pisces, things will not be clear, and that may impede such actions.
- Jupiter in Cancer will be involved in trines throughout the month, and this can result in beneficial actions being taken for families and personal security.
