

**THE LUNAR MONTH**  
**JUNE 6 – JULY 5**

## REVIEW OF LAST LUNAR MONTH – MAY 7 TO JUNE 6

- Tensions in the world will remain heightened through mid-May and a little beyond as a result of the semisquare between Saturn and Pluto.  
Casualties and tensions have ramped up as Israel has moved into Rafah, and pro-Palestinian campus protests were very prevalent in the first half of May. But since deaths in Rafah have continued beyond mid-May, not everything is a result of just the Saturn/Pluto semisquare. For instance, on May 29 the planets Chiron and Mars were conjunct, and that can also cause some wounding.
- The second half of May will see more optimism, though, as a result of a sextile between Jupiter and Neptune.  
I don't know if this has happened, but [info.ndr.com](http://info.ndr.com) does a regular NDR Crowd Sentiment Poll that measures people's optimism, and I will check back periodically to see when they have the results for May.

- A conjunction of Mars with Chiron in the last week of May, however, could manifest as more wounding for the world. The best outcome, though, would be not violence but the rise of true spiritual warriors who seek enlightenment over war. A lesser outcome would be false spiritual warriors who are driven by religious or political fanaticism.

More civilian deaths in Rafah occurred during this conjunction. On May 30, it was reported that at least 53 across Gaza were killed, and more European countries are formally recognizing a Palestinian state.

- An emerging “mini-grand trine” between Jupiter, Pluto, and Neptune that culminates in early June will bring more technological growth, vision, optimism, and humanitarian concerns to the forefront this month.

Violence in Gaza has heightened the call for humanitarian aid and resulted in groups of countries calling for change. However, the role of Hamas in perpetuating this conflict often seems to be ignored. Some technological advancements that were in the news were (1) wider use of artificial intelligence, (2) the rise of generative AI that can create new content on its own, (3) advances in the efficiency of solar cells, and (4) the convergence of AI and quantum computing.

## OVERVIEW – JUNE 6 TO JULY 5

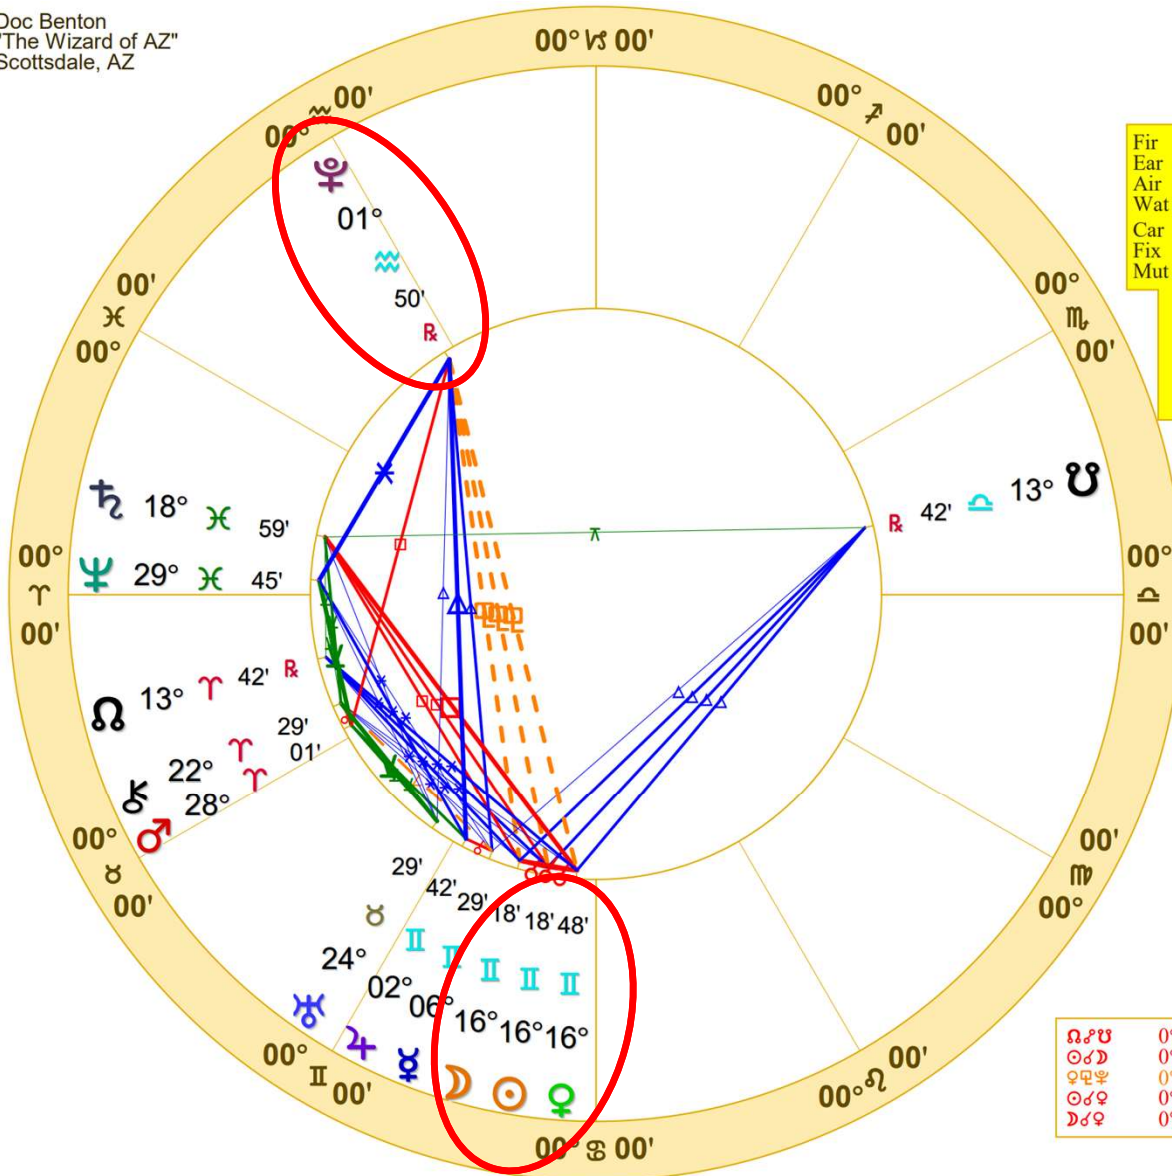

- A strong sextile between Neptune and Pluto will endure throughout the lunar month, and it will result in more transcendent thoughts and inspirations for many.
- The lunar month will begin with frustration and irritation with the thoughts of others as Saturn squares the Sun, Moon, and Venus while Pluto makes a sesquiquadrate to the same.
- However, at the same time, a small triangle between Jupiter, Pluto, and Neptune at the start of the lunar month will help release some tensions and promote higher thinking.
- Much of the month will consist of fast-moving irritations (hard aspects involving inner planets) and pressures for change (inconjunct aspects).
- The first half of the lunar month will have a focus on ideas (Sun, Mercury, and Venus in Gemini) while the second half of the lunar month will focus more on security (Sun, Mercury, and Venus in Cancer).
