 Look before you launch a retort or profess an opinion, as your reactions may not be exactly what's desired by the more critical around you. Fertile ground for your feelings is available, however, if you take care to avoid the rocky patches in-between. Don't waste emotional resources on the unappreciative.

Where you encounter arguments with your personal insights, it may be the better part of valor to keep them to yourself for dissemination on another day. Arguments are likely to cause more ill

will than clarity, as circular reasoning simply fuels the fires of debate without resolution. Wait until new light comes.

|             | Overblown schemes can get out of hand, and the best-laid plans may need some revision to get back on course. Nevertheless, the overall strategy is probably still sound, so trim around the edges but don't throw out the baby with the bathwater. Resistance fades as you streamline, then your clear again to fly. |          |         |                            |   |

Contemplation can turn spiritual mysteries into words that illuminate and comfort, so listen well and set down what comes to you.    |                             |          |         |                            |                |                            |

satiation all around. It doesn't show much on the surface, but when the doors close and the shades go down, it's all the way - literally or figuratively. Dipping your toe in is not what's happening now, so beware if you try to -- you may be pulled in headlong with the rest.

| Voracious appetites can be a drain on your energies, so don't give it all away to a single, demanding voice. Be generous, but not to a fault, and share your bounty where it does the most good. | Diminishing returns can mean an energy drain, even when it looks like everybody's in there to help push things along. Repeated attempts to make the job go better can simply tire without accomplishing much. Once you've got it done well enough, leave well enough alone and move on to the next. | Quiet messages without red flags will relay the signals of the heart to their targets. Simply put, without fanfare, what you mean will be just what is said and what is understood. Don't try to say it all at once, but put it out a piece at a time in little packets that, taken all together, tell the complete story.            |                                     |          |         |                            |   |

| The coming year witnesses a shoot-now-ask-questions-later approach to new developments all around, in which the tendency is to jump onto new bandwagons before you check to see if they have wheels. There's a feeling of racing ahead into the future, but to where, really? Catch the tide, but keep your eyes open, ask questions. |                                     |          |         |                            |   |

Ideas that usually come in spurts even out into a flow, which makes progress on new fronts

move forward easily. Much of that may be attributable to a more receptive environment where your originality gains more acceptance and respect and you can move unhindered, hand in hand with your personal muse.

Pressing the point too strongly only leads to arguments, not triumph, so when you catch wind of weak positions strongly defended, pass them by and they will collapse on their own. Although the opportunity may present itself to get into a shoving match over personal territory or convictions, in the end there is little ground to be gained and much energy to be wasted. It may be difficult to communicate your inner message, and sometimes trying to explain it to death just makes it worse. If you can't get yourself heard on one issue, drop it and try another. Carping on about the same subject will just get annoying for everyone. Better to be partly understood and leave it at that.

A good belly laugh satisfies everyone right now, and refined taste is not necessary to make a hit. In fact, nuance may not be much in demand at all, so don't expect you're subtleties to get lapped up. Go for the gusto, along with everyone else, or else sip your sup on the side. Don't knock the slapstick, however, it's still classic.

The dance is underway and for the moment, you lead, others follow in pursuit. Strut your stuff and don't stand still, because it's your motion that's getting the attention. You needn't strain yourself -- in fact, it's your fluidity and grace that makes you a magnet. Just move with the music, swing your partner with abandon.

People will say anything for a laugh about now - and for the next few weeks they'll tend to just say anything in general and then keep talking. Blue-sky blustering is the order of the day, but there's a kernel of truth in some of those free-form filibusters, so don't overlook that fleck of gold gleaming in the pan.

Good information from reliable channels should be all you need to shore you up and keep things in repair. Clearing and cleaning away the cobwebs from your information sources will make sure that when the lines falter, you'll still be in contact. Telling small truths now will cement contacts you can rely on later.

It's particularly easy to get your inner message across, and words don't get in the way even when trying to communicate non-verbally. Just visualize what you want to make known and before you know it you'll be proclaiming it in the most appropriate fashion. Don't over prepare or edit yourself, just let it flow.

If you can dream it, you can do it, or at least that's the way it feels. Energy expended for wish fulfillment and higher callings is never wasted, especially if you stay the course. Even if you seem to lose your way from time to time, you've got enough extra to explore all the possibilities of the journey.

Desires too hotly pursued often cloy, and the more you push, the less satisfactory the result. If the first couple of tries don't get you all you want, figure that's all you're reasonably going to get for the moment -- save your energy for a new need that will require your loose juice to satisfy.

| <p>Don't let your appetites get the better of you. Trying too hard to get exactly what you want may ruin the flavor of things, wasting time and resources. Don't overcook the stew, because once done, you can't go back. Well-done can never be medium rare again, so quit while you're ahead, even if it's not perfect.</p>        |                                     |          |         |                            |                            |

Trying to explain your way out of a hopeless situation is in itself hopeless, so don't waste the effort. If things get just too lost and confusing, pull out and try something else. Original thinking may be a hard sell, at least your particular variety. It may take a few stabs to find real appreciation for your original brand of genius, but nothing ventured, nothing gained. If you keep putting it out there, the right buyer will come along, but don't give up the day job -- at least for the moment.

The coming year witnesses a shoot-now-ask-questions-later approach to new developments all around, in which the tendency is to jump onto new bandwagons before you check to see if they have wheels. There's a feeling of racing ahead into the future, but to where, really? Catch the tide, but keep your eyes open, ask questions.

| New Year's resolutions are just part of the getting-earnest style of the next month, where sincerity, business, and sometimes desperation are the drivers which themselves lose steam when the New Year turns out to be just another new year. Pretending deadly seriousness can be a kick, but living it is a drag, so play there, but don't stay there. |                        |          |         |                            |                         |                            |

| If you can put it into words, you'll find someone who wants it, so put it out there and be articulate. Anything you say can find a market if you give it some thought, so put your thinking cap on and start filling orders. A pleasant turn of phrase and a positive attitude is what's in demand, and you've got it.                                    |                        |          |         |                            |                         |                            |

It can be too easy to keep trying to force the issue when you can't exactly put your finger on how you feel about things. Uncertain sentiments don't really get more tangible by pushing them, so don't wear yourself out attempting explanations or in-depth elucidation. There is no blame in ambiguity.

You may find yourself in the middle of an open war between the old and the new, what seems safe based on past experience and what looks promising according to the latest evidence. Your best bet is a major effort to compromise and blend the two. Barring this, split your stakes and follow both individually.

|             | It may be time to heed the discoveries and inspirations of others, especially when they do not jibe with your own. Nothing educates like opposite opinions, though resolving them into a common vision takes time. Open your eyes now, put your ego on hold and give a serious listen. Trying to explain your way out of a hopeless situation is in itself hopeless, so don't waste the effort. If things get just too lost and confusing, pull out and try something else. Misleading information is likely the cause, so don't apologize for not cooking the meal when you don't really have the right ingredients.

If you can say it, you can have it, so don't hesitate to articulate your desires and you can get what/whom you want. Chances are, you'll be hearing news of the availability of what you've been looking for -- just sing out, and it's yours. Putting your world into especially beautiful order comes easy, so take the opportunity.

Expect support for your wish-fulfillments and be ready to take it all in when it's offered. Your tastes are favored, so spread them around and make yourself available for whatever perks may come as a result. Just saying yes is the way to go, and even requests for seconds and thirds will not be denied.

What you feel is right and true, and what you aspire to, may seem a bit at odds with circumstance right now, but debating the issues will likely not bring much clarity. Where you beg to differ, beg off and let it ride. Things have a way of clearing up by themselves both inside and out, so let them.

If you don't get what you want in one place, don't try to beat down the door trying to get in. Move on and try something else. Your determination should lie in the search, not fixated upon one entry alone. If one door won't open, the next will -- it's not the door, it's whose inside you need to court.

Groupthink and inclusiveness analysis are very much the mindset for the next month, which can broaden horizons but limit your individuality. You'll do better at least temporarily as a team player, but don't forget yourself in the technocracy of the moment, as when general moorings are lost, you'd best have your own.

Your more conservative side gets a boost and you may find that what and whom you have relied

on before is still firmly behind you. You don't have to break the rules to make forward progress, and heaven rewards those who are patient enough to play the game and wait their turn. Well, most of the time, anyway....

This is not through ill-intentions or contrariness, but likely just misunderstanding and temporary misdirection. It may take some extra energy to redirect traffic, but this too will pass. |          |         |                            |                            |         |

Trying to explain your way out of a hopeless situation is in itself hopeless, so don't waste the effort. If things get just too lost and confusing, pull out and try something else. Misleading information is likely the cause, so don't apologize for not cooking the meal when you don't really have the right ingredients.

Passions run high for the next few weeks, with flashes of intense desire suddenly trailing off into satiation or ennui. So if you're looking for intensity, now's the time to jump into the pool - but commitment after you're there may be hard to hold on to. Hunger pangs, once fed, lose their urgency.

It may take more than one try to sell your track record, however reliable it may be. It's really a matter of finding the right buyer with the right needs, and that's an occasional thing at the moment. You may be better off showing off your future potential rather than your past, as times have changed -- move with them.

Grand strategies are only as big as their individual components, and great skyscrapers are put together one girder at a time. Fulfilling the vision as it presents itself is the way to go, with smaller, surer steps preferable over giant strides of the imagination. Take it easy, and all will unfold.

| The dance is underway and for the moment, you lead, others follow in pursuit. Strut your stuff and don't stand still, because it's your motion that's getting the attention. | The ability to put nonverbal images into words is a precious commodity, one you can trade on for the moment. Even blindfolded, you'll be able to pin the tale on the dream and speak for others who are not so articulate. The trick will be to remember later how you did it now, so keep an eye on the monitor and watch your performance. |                            |          |         |                            |                            |        |

| Thinker's block may pop up now and then, when you just can't get your head around a challenge or the right information to provide a solution gets momentarily sidetracked. This temporary brain drain is solved by stopping to take a breath, then turning your attention back to the matter at hand. Try, try again. |                            |          |         |                            |                            |        |

| If you can dream it, you can do it, or at least that's the way it feels. Energy expended for wish fulfillment and higher callings is never wasted, especially if you stay the course. Even if you seem to lose your way from time to time, you've got enough extra to explore all the possibilities of the journey.   |                            |          |         |                            |                            |        |

Don't allow your most cutting-edge material to be used for mere amusement. If you are not truly appreciated, or are criticized about irrelevant details, gracefully withdraw. Casting pearls before swine is a waste of your time. A discerning audience awaits you, so wait for it to come along and save your treasures.

Small acts of faith and trust are a sure way to build a following, and you don't have to risk your life for someone to show that you are a firm supporter. Put your energy where you know it will count and build and it will come back to you. It is not a single action but the sum of many that will tell the tale.

Putting the right phrase to the task is not the focus for the next few weeks - so if you're at a loss for words, join the party. But words aren't everything, and those slippery concepts that emerge right now can yet be pounced upon when the time is right, like a cat on a mouse, and nailed to the ground. Just mind your mind in the meantime.

Ideas that usually come in spurts even out into a flow, which makes progress on new fronts move forward easily. Much of that may be attributable to a more receptive environment where your originality gains more acceptance and respect and you can move unhindered, hand in hand with your personal muse.

 There's sweetness in simplicity in the air, and the good old pleasures haven't lost their appeal. For the next few weeks, you don't need fancy cuisine to take a nice bite out of life, or so the general opinion seems to run. If that leaves you yawning, just wait it out and live on what's around until things spice up.

 A steady, even gait eats up the miles and leaves you feeling effortlessly refreshed. You don't have to be miserly with your fuel to save on gas, just do your body's speed limit without going over and you'll have plenty extra to burn.  Voracious appetites can be a drain on your energies, so don't give it all away to a single,

demanding voice. Be generous, but not to a fault, and share your bounty where it does the most good. Criticism disguised as a compliment also hides self-interest that is not your own. Vampires seldom look like bats, but feed nonetheless.

There's a fairly sudden shift of energy as a month of urgency begins, painting a patina of action and purpose on a previously passive environmental palette. Patience and gestation won't do anymore, time to get up and go - but exactly where to may be the puzzle. Preventing premature detonation while delivering a timely bombshell is the challenge of the month ahead.

You can address your feelings very precisely right now and can put into words emotions that have previously eluded expression. When asked, tell it like it is and your arrow will go straight to the bull's-eye. Make sure of your target, however, as you might not want to overwhelm with honesty and reveal all.

Walls that need testing get a little pressure to see if they stand up or are, in fact, necessary at all. Bending or amending the rules may be the best way to go, and a positive attitude will put a smile on the dourest face, which might even be your own. It's time to remember that most restraints are self-imposed.

|             | A generation-long period begins in which spreading equality of opportunity is a prime cultural force, a time to re-forge society and hand it to the common people. Independence of operation is the order of the day, as is great expansion. The resulting generation, however, will have a hard time holding together what results as a unity. |          |         |                            |                            |         |

|             | General agreement on what's required means mutual efforts toward gratifying joint appetites. Share your feast and you'll get invited to everybody's party. It's a good time for collecting whatever you want as there's more to go around, at least of what you're interested in. Gracious acceptance creates more giving. |          |         |                            |         |        |                            |

|             | A bootstraps push to put things back in order the next month or two is natural -- and can profit you, but it can be overdone as well. The temptation to cut out important details in favor of finishing up will haunt you later. Slow down and pace yourself.  |          |         |                            |         |        |                            |
